Before and after – pigmentation

What is dento-facial aesthetics?

Dento-facial aesthetics is the field of dentistry that takes the art of smiling beyond just the teeth and inside the mouth to look at your face as a whole, so your smile can be the best reflection of your confidence in your appearance.

Using simple, time-efficient and minimally invasive techniques dento-facial aesthetics serves to compliment beautiful healthy teeth with smoother, rejuvenated skin and balanced facial structure, all the while ensuring the enhancements appear natural.

At Bowman Dental we understand the effects of the natural ageing process on the face and through a pre-treatment assessment will discuss suitable, age appropriate options for enhanced dento-facial aesthetics – this may include using injectibles such as Botulinum Toxin Serotype A (BTx-A), and dermal fillers to counter wrinkles and grooves resulting from volume loss, repeated muscular contractions, and lost skin elasticity.

Injectibles and dermal fillers can be used for cheek enhancement, chin enhancement, lip enhancement, smoothing frown lines, reducing hollowing under the eyes that occurs as we age, lifting downturned corners of the mouth and more.

At Bowman Dental in addition to BTx-A and dermal fillers we offer a range of medical grade laser treatments in conjunction with Professional Skin Solutions to improve facial aesthetics, smooth fine lines and wrinkles and reduce the effects of sun damage, surgical and acne scarring, stretch marks and rosacea. Medical grade laser equipment is the highest quality available and offers you the most effective treatments.

Will it hurt?

As dentists we are highly trained in giving facial injections. Our team is focused on making procedures as comfortable for you as possible, with dermal fillers placed under local anaesthetic.

How long will it take?

The length of time will differ from treatment to treatment, with each patient's needs requiring a unique response. A pre-treatment assessment is essential to establish which dento-facial aesthetics options best suit you and a course of treatments follows.

This card is designed purely as an introduction to dento-facial aesthetics. It is not intended to replace advice from a dental professional.

If you have any questions please feel free to talk to us in person.

We also have pamphlets containing more detailed information on this subject.
